

INSTALLATION GUIDANCE

KIDS Ceramic WC with Wall Discharge

B&M SKU: **ID10316** Idral code: **10316**

Installation sequence

- 1 Confirm the exact product and connection arrangement against the official Idral technical drawing before work begins.
- 2 Installation must be completed by a competent sanitary installer on a structurally suitable substrate, using appropriate fixings and seals.
- 3 Position the pan level, connect the specified discharge and flushing system, then secure without over-tightening the ceramic.
- 4 Complete all joints, allow sealants to cure, test several flush cycles and check for movement or leakage before use.
- 5 WC seat/cover, flushing system, fixings and connection parts are not included unless expressly stated in the order.

Important

Seat and cover are selected and sold separately. No compatibility with ID11306 or ID11306B is claimed. The official technical specification remains the controlling dimensional reference.
